

Boost your phone system performance, cut costs and say goodbye to complexity.

SIP Trunking takes your voice communications to the next level by routing calls over the Internet, plus it guarantees you free long distance calls.

GigTel SIP Trunking offers the most versatile solutions for businesses seeking to improve their voice communications.

Free Internet Calls

Call for free within your organization regardless of location.

Virtual Local Numbers

Provide local calling rates to nearly any place on earth. Or make it toll-free.

Flexible Organization

Funnel all calls into one reception or divert them where you want them to go.

Monitor & Record

Easily record calls and monitor traffic in real-time to optimize resources.

Leverage Data

Dig into call statistics such as wait times and volume for continuous improvement.

Pay One Bill

Bring all your voice endpoints into one platform. Pay one bill for fewer headaches.

Get Lower Rates

Pay less than traditional telecom rates. No more rounding up charges.

Keep The Same Number

Port current numbers over to a better system and never miss a call.

Now you can improve organization, increase performance, and leverage significant savings of up to 50 to 70% vs. existing local access.

Powerful tools, improved business communications, and better cost control.

Your business. Always connected.

We provide the highest quality solutions and a tenacious commitment to our customers.
