

Communication and Collaboration for: **Automobile Dealerships**

Empower your staff and watch your automobile dealership thrive.

At GigTel® we understand that maintaining clear communications and excellent customer service within an automobile dealership can be a challenge. Dealers are tasked with providing consistent, customer-focused experiences that can be hindered by old technology, outdated platforms, and bad communication between team members. Seamless and effective communications are vital to thriving in this ultra-competitive industry.

Why replace outdated or legacy phone systems with GigTel?

Old technology is unreliable and expensive. Discontinued systems force businesses to spend a lot of money in maintenance and constant hardware upgrades to run at the bare minimum. But that's not all.

Aging infrastructure restricts productivity and can bring the workflow to a complete stop which hurts the bottom line. To overcome these challenges, more and more auto dealerships across North America are adopting cloud-based technology to unify their communications and improve customer experience.

GigTel provides affordability, ease-of-use, productivity and customer service features that are now a necessity for any auto dealership. The advanced and flexible features are cloud-based, so multiple sites can seamlessly connect to the same solution. The solution can be implemented quickly and can be done with little or no IT staff.

GigTel Unified Communications as a Services (UCaaS)

Designed to accelerate and unify team communications, GigTel's solutions will effectively eliminate silos and unify communication capabilities into a single, tightly integrated system that scales across all of your departments and locations. By using our UCaaS solution, your dealership will be able to:

- Streamline selling processes.
- Create a complete customer experience.
- Optimize sales and customer conversations.
- Gain an all-inclusive solution with a predictable, "no surprise" monthly fee.
- Manage inbound calls from one central location.
- A secure platform with 99.999% availability.

Your business. Always connected.
