

## Communication and Collaboration for: **Legal Professionals**

### Don't be judged by the quality of your communications platform!

At GigTel™ we understand that a phone call is often a first point of contact with clients. Firms are tasked with providing consistent, customer-focused experiences that can be hindered by old technology, outdated platforms, and bad communication options for team collaboration. Law firms of every size depend on communication solutions for every aspect of their work, from case preparation to meeting with outside counsel. Reliable office phone systems are a vital part of your success.

### Why replace outdated or legacy phones systems with GigTel?

Old technology is unreliable and expensive. Discontinued systems force businesses to spend a lot of money on maintenance and hardware upgrades to run at the bare minimum. To overcome these challenges, firms are migrating to cloud-based technology, allowing firms to focus on their business instead of the underlying technology.

GigTel provides affordability, ease-of-use, productivity and customer service features that are now a necessity for any legal professional. The advanced and flexible features are cloud-based, so multiple sites can seamlessly connect to the same solution. The solution can be implemented quickly and can be done with little or no IT staff.

### GigTel Unified Communications as a Service (UCaaS)

Free your attorneys, paralegals, and essential staff from the confines of their office. GigTel's robust set of mobile-ready features like the mobile app, audio and video conferencing, voicemail-to-email transcription, group chat, file sharing, call forwarding, and more, give your staff freedom to work from anywhere. Whether in the conference room, in court, or at home, GigTel's communications & collaboration solutions provide legal staff with full access to all system features on any device, at any time.

By using our UCaaS solution, your firm will be able to:

- Utilize cross-platform collaboration tools.
- Seamlessly record calls and automate call reports
- Ensure accessibility to clients
- Gain an all-inclusive solution with a predictable, monthly fee.
- Route inbound calls from one central location.
- Operate on a secure platform with 99.999% availability.
